

API COUPLER

The Behsazanbazou API Coupler is the standard in “drip-less” bottom loading couplers requirements to significantly reduce liquid loss at disconnect in gasoline applications. high performance Viton® seals are standard, providing excellent wear and fuel resistance. Compatible with gasoline with up to 20% MTBE content.

- Coupler available in 4” size only
- Designed for “less mess” at your loading rack – the new, easy, self-aligning 5-Cam design ensures a tight connection to truck adaptor and resists side forces.
- Long-life performance – extended wear operating lever has a built-in roller bearing to provide smoother operation and extended life.
